

## skills & summary

I use my design skills and cross-pollinate them with my interests (industrial design, fashion, internet, computers, new technology, travel, music, dj'ing, photography, food, cooking, skiing, golfing) to arrive at new, lateral solutions and new perspectives for my clients. I can learn anything. I can learn quickly. I have the ability to visualize and understand concepts quickly, apply outside ideas and then arrive at unexpected solutions.

**Specialties:** manufacturing, machining, packaging design and manufacturing, tradeshow experience, products, computers, technology, marketing, conceptualization
